

EM GOLD MAGNET STARS S3 Mounting Instructions

This EM GOLD MAGNET STARS S3 include one integrally formed key-hole on the rear surface for wall mounting, as describe below.

Note: This is for paper holder

The hardware included with this item is meant for drywall mounting only. If your wall is made from another material such as concrete or plaster, please consult your local hardware store for assistance in selecting the correct hardware.

Hardware Included: 3 Screws, 3 Anchors, and 6 Magnets

Tools Needed: Phillips Screwdriver, Pencil, Stud-Finder, Level

- 1) With the help of others, hold the item upright and level against a wall at a desired mounting location. Use a level to ensure that the item is level and then use a pencil to mark the wall through one mounting hole. Set the item aside
- 2) The provided anchors cannot penetrate wood so we have to determine if either mark of Step (1) happens to align with a wall-stud (vertical wood members located in the wall). Use a stud-finder to determine this. If either marks does align, do not install a provided at this mark. Use a screwdriver to secure a provided screw at this mark. Rotate the screw clockwise until the screw head is about 3/8 inch from the wall.
- 3) If the lower mark of Step (2) does not align with a stud, then we have to first install an anchor. To do this, engage a Phillips screwdriver with an anchor and position the tip of the anchor at the lower mark. Firmly push the anchor into the wall as you rotate it clockwise. The anchor will drive itself into the wall like a large screw. Continue rotating until the wide part of the anchor becomes even with the wall.
- 4) Insert a screw into the installed anchor of step (3) and rotate the screw until it's head is about 3/8 inch from the wall.
- 5) Carefully position the **EM GOLD MAGNET STARS S3** against the wall so the protruding screws are received by the hole. Lower the Star until the screw engage and support its weight.
